

**Are you sitting down?--More Ch-Ch-Changes!**

**Dear Sustainable Growers,**

**I am moving to Michigan for a couple years or so.**

**When?**

**Estimated departure is around spring equinox, (March 21).**

**Why?**

**And what about contact, herb conference, Good Earth Garden School, etc.?  
*Please see attachment.***

**What about classes?**

**I will not be teaching at Matanuska-Su College this spring.**

**I am very, very excited to tell you that Wendy Anderson will be teaching this Organic Gardening course. She and I taught this course together for many years. Wendy now has permaculture training to add to her extensive garden design and organic horticulture expertise. She is an excellent teacher and more knowledgeable than me. So, yay!**

**Again, the new dates are six Friday evenings, March 21, 28 and April 4, 11, 18, and 25. The time is from 6:00 to 8:30 pm.**

**You'll learn how to:**

- **Refine your composting techniques,**
- **Fertilize organically,**
- **Balance soil nutrients, and**
- **Manage pests and weeds non-violently**
- **Build nutrient density into your food crops**

**You go away with**

- **a garden plan that fits your site**
- **a prepared strategy for correctly preparing and amending soil,**

- a list of varieties (that turns into a seed order) you can grow in this climate,
- a lot less mystery about where to start and what to do

Such fun. Do register now by calling 745-9746 for information or register on line at [www.uaa.alaska.edu](http://www.uaa.alaska.edu) and follow Wolf Link for Agri 138, Organic Gardening.

Enjoy the returning light, and all the new possibilities the new season holds for you,
